

These Are Bolt Clipper Times

VOL. I

EVERETT MASS., U.S.A.

NO. 4

Saving time with a Bolt Clipper

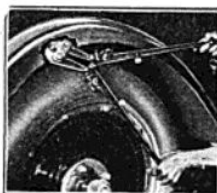

Try to justify that labor charge when rusty nuts have doubled and tripled the cost. Try to make your cost fit the flat rate charge—and you won't get far until you realize that the best mechanic in the world can't make time with the wrong tools. Porter Bolt Clippers are time savers and time in your shop means money. Porter Bolt Clippers are made in several models—*bolt*

Cutting Transmission Band

clippers to cut off bolts up to $\frac{3}{4}$ inch in diameter. These clippers are made *end cut*, *side cut* and *angular cut*, to fit your requirements. Nut splitters to split nuts that cannot be removed with a wrench. The large size splits the nut of a $\frac{5}{8}$ -inch bolt, practically instantly. And then there are other models—chain cutters, bench cutters, wire cutters, etc.

If you save ten minutes a day of labor time you have easily saved in one year the interest on one thousand dollars. You can equip your shop with several bolt clippers good for years of service for a mighty few dollars. Buying the right

tools is not a matter of making the work easy for your men but rather of making money for yourself. That a bolt clipper is a "right" tool is evidenced by the work it is doing for mechanics everywhere. That

Porter's Bolt Clippers are specifically right is evidenced by their sale in every civilized country on the face of the earth.

Don't let that name *Bolt Clipper* suggest a limited use for these tools. Back nearly half a century ago this tool was perfected for the carriage building trade to cut off body bolts—hence the name. As a matter of fact the tool will cut rods and wires as well as bolts and the uses to

Cutting Chain

which it can be put around any shop are unlimited. Certain models do not cut bolts but split nuts and are essential on any dismantling job. You want to know about any tool that will make money for you, therefore, you certainly are going to write for full particulars about the Porter line. And bear in mind that Porter Clippers have been made for nearly fifty years—they are not an experiment. Write to your supply dealer or direct to H. K. Porter, Inc., Everett, Mass., for Porter's Manual.
